For the prevention and cure of
BILIOUS AND MALIGNANT FEVERS
is recommended
HAHN's ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of persons can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

—

Hamilton's Elixir,

A sovereign remedy for colds, obstinate coughs, asthmas, sore throats, catarrhs, and approaching consumptions.—To parents who have children afflicted with the *HOOPING COUGH*, this discovery is of the first magnitude, as it affords immediate relief, checks the progress, and in a short time entirely removes the most cruel disorders to which children are liable. The Elixir is perfectly agreeable, and the dose so small that no difficulty arises in taking it.

French Creek Boarding School.

The following is published for the information of Parents:

HAVING long believed that a School on a plan different from most others in many respects, would be beneficial to society, and apprehending that with all its cares, and the responsibility inseparable from such a concern, I could more cheerfully devote my time to the education of children than to any other business, I have concluded to establish a BOARDING SCHOOL for GIRLS.—With this view I have purchased the FRENCH CREEK FARM, four miles east of the yellow springs, on the Norristown and Philadelphia road, situated in Pikeland and Vincent townships, Chester county, twenty-seven miles from Philadelphia, combining many conveniencies for the support of such an institution; and having let the farm, etc. in a way calculated to supply the family with provisions, I propose to devote my attention, with the aid of suitable assistants, to the education of the children who may be placed under my care.

In selecting the pupils, it is not proposed to be governed entirely by their ages, nor to require that they shall all be members of the religious society of Friends; but as the school rules will be very few in number and very simple, it is my wish that none may be sent contrary to their own inclination, nor any one who would not be likely to be good examples to the other scholars, and treat them with kindness and affection.

The price for board and tuition will be two hundred Dollars per annum, one quarter always to be paid in advance—no restrictions respecting the kind of clothing are intended, nor respecting the frequency of the changes that parents may require; the washing will be charged at the ordinary price per dozen—children may be admitted for one quarter only, and such as are entered for a longer period, may nevertheless be removed at the expiration of any quarter.—The communication with Philadelphia will be frequent and easy by stage, and a house of entertainment kept by the farmer for the accommodation of persons having business at the school.

Reading, Writing, Arithmetic, English Grammar, Geography and the use of Maps and globes, will be taught, together with such other branches as the progress of the children and experience may render expedient. The school to open the first of the 5th month next. For further information apply to Edward Stabler, Alexandria, or to

RURAL ECONOMY.

Receipt for making Cider and preserving it sound for years.

Three months ago I was at the house of Nicholas Nall, Esq. who lives near Deep river, at the upper extremity of Moore country, where I drank old cidet of a very superior quality, and as the habitual use of cider is eminently conducive to health, ensures sobriety, imparts the agreable sensation of strength and vigor, and is a pleasant beverage that can be afforded at a small expence, I took care to be exactly informed of his manner of making, refining and preserving it, in the hope advantage might accrue by publication of it. Mr. Nall had in his cellar, as well as I now remember, about 8 or 10 hogsheads and 50 or 60 barrels of cider of different ages—the oldest was the best, nor did he think any fit to drink till it was at least a year old. That which I drank was three years old, and it was excellent. His oldest cider I did not taste, as he intended it as a treat for his executors.—He complained that his stock was too small to enable him to drink it of the age he wished, but intended to fill another cellar. I here copy Mr. Nall's receipt, as he gave it to me in writing, in April last.

"All apples fit to be eaten will make good cider. The grand secret is in cleansing it from the filth and dregs as early as possible. Each sort of apples are to be beaten and pressed by themselves. Two kinds of juice, both good, would if mixed, often make bad cider. Throw out all imperfect, sorry, and sun burnt apples, as well as dust and trash—Beat your apples before much mellowed, as they lose their strength, soundness and spirit if too mellow. Let them stand half a day after being beaten before put into the press; then press them slowly, discontinue it as soon as the juice discharged appears to grow thin and watery. The advantage of slow pressure is in making the liquor run pure. Let your casks, previously well cleansed, be filled quite full to permit the froth and pumice to discharge itself at the bung. When the fermentation abates, cover the bung closely with something that may be lifted by the fixed air that escapes during the future fermentation. In a week rack off the cider carefully, ceasing the moment you observe it to run muddy. Now stop the cask more firmly. In ten days rack it off a second time, and in fifteen days the third time. In every instance the casks are to be clean and perfectly filled, and when filled for the last time, to be bunged close, placed in a deep dry cellar, not to be moved until drawn for use. Late cider need not be racked until March, and then one racking, or at most two, will be sufficient. Be very careful that no water, not even the little that will adhere after rinsing a cask, is mixed with the cider. The smallest quantity of rain-water will render cider unfit to keep. The addition of any quantity of distilled spirits is not only useless but injurious."

Mr. Nall's plan is the result of long experience, and its success justifies me in recommending it to the public. I hope it will be tried.

CALVIN JONES.

Raleigh, (N. C.) July 25th, 1818.

N. B. I ought to have mentioned that Mr. Nall told me he had for many years tried various plans for clarifying cider to prevent its souring, by means of milk, isinglass, scalding and scumming, filtering through sand, &c. &c. and found all useful, but is satisfied that frequent racking or drawing is far preferable to any other method he has attempted.

King James 1, mounting a horse that was unruly, cried, "The de'el tak my saul, sirrah, an ye be na quiet, I'll send ye to the five hundred Kings in the hause o'Commons. They'll sune tame ye."

Lord Hunsdon, in Queen Elizabeth's time, said, "To have the courage to observe an affront, is to be even with an adversary. To have the patience to forgive it, is to be above him."

LOO-CHOO ISLANDS.

[No. 3.]

O! wonder!
How many goodly creatures are there here!
How beauteous mankind is! O brave new world,
That have such people in't!
SHAKSPEARE.

How it happened that so interesting a portion of mankind should, for so many centuries remain unknown to the western world, may be worth investigating, and for aught we know, may be difficult of solution. They unequivocally appear to be a race of Chinese; and though they speak an entirely different language, use the same character in writing. That in the constant trade kept up between the country ships of Bombay, Bengal and the other British possessions in India, neither accident nor curiosity, nor avarice nor enterprise, should have brought any of the merchants or mariners within the hearing of these islands—that neither through the Chinese, Japannese or Malayans, any intelligence respecting them should have been acquired by the inordinate avarice of the Dutch, the perennial restlessness of the French, or the insatiable thirst for speculation of the British traders, seems most extraordinary. Be the cause, however, what it may, the truth is undeniable, that this is the first time the existence of such a people was particularly announced to the world at large. The Corean islands are literally innumerable. It is ascertained that "along the southern part of the coast of Corea there exists an Archipelago of more than a thousand islands, forming bays and harbors, in which all the navies of the world might ride in perfect security." They are all apparently inhabited, generally high, rising like so many detached mountains, each on its own basis, out of the sea, and cultivated where practicable." "The English at first, (says captain Hall) thought of counting them, and even attempted to note their places on the charts which they were making of the coast—but their great number baffled the attempt. They vary in size from a few hundred yards in length to five or six miles, and are of all shapes. From the mast-head other groupes were perceived lying one behind the other to the east and south, far as the eye could reach. Frequently above a hundred were in sight from deck at one moment. The sea being quite smooth, the weather fine, and many of the islands wooded and cultivated in the vallies, the scene was at all times lively, and was rendered still more interesting by our rapid passage along the coast, by which the appearances about us were perpetually changing. Of this coast we had no charts possessing the slightest pretensions to accuracy, none of the places at which we touched being laid down within sixty miles of their proper places. Only a few islands are noticed in any map; whereas the coast for nearly two hundred miles is completely studded with them to the distance of fifteen or twenty miles from the main land."

These islands swarmed with inhabitants—the English landed on several, the natives of which showed the greatest impatience for their departure. Few of them exceeded three or four miles in length, and the spaces between them were from one to four miles. On the boats approaching the land, the women fled with their infant children, whilst the men hallooed to the strangers not to advance. They afterwards became somewhat more friendly—brought them water to drink, and offered them a share of their humble fare—then, as if suddenly recollecting that they were doing wrong in holding intercourse with barbarians, they would lay hold of some of the gentlemen by the shoulders and push them away, pointing to the ship. Generally, wherever they landed, they found the same impatience to get rid of them—the same aversion to enter into traffic—the same jealous seclusion of the women, and the same pacific though repulsive deportment, with the same appearance of comfort and good order.

Standing to the southward from what the Edinburgh Review calls "*this garland of islands*," they passed a volcano which they called Sulphur island, where they could not land on account of the surf, and came in sight of the shore of the great Loo-Choo.

"No people that we have yet met with, (says captain Hall) have been so friendly; for the moment they came along side, one handed a jar of water up to us, and another a basket of boiled sweet potatoes, without asking or seeming to wish for any recompense. Their manners were gentle and respectful; they uncovered their heads while in our presence, bowed whenever they spoke to us; and when we gave them some rum, they did not drink it till they had bowed to every person round. Another canoe went near the Alceste; and a rope being thrown to them, they tied a fish to it, and then paddled away. All this seemed to promise well, and was particularly grateful after the cold repulsive manners of the Coreans."

Approaching this island, as the weather cleared up, a rich extent of cultivated scenery burst upon the view, "rising in gentle ascent from the sea, the grounds were disposed more like the finest country seats in England, than those of an island so remote from the civilized world." *It was the principal island of the Loo-Choo groupe, hitherto unvisited by any Europeans.* They anchored in front of a town where *a number of vessels were lying in a harbor*, the mouth of which was formed by two pier heads. Thousands of the astonished natives, perched on the surrounding rocks and heights, gazed on the vessels as they entered. Several canoes with official men in them, came along side, wishing to know who they were, and what was the purport of their visit. By means of a Chinese interpreter whose language some of them understood, it was explained to them that the ship had sustained some damage in the late gales; and to give a color to the story, the sea water was let into the well and the chain-pump set to work, to the great amazement of the unsuspecting people, who seemed to sympathise with their misfortunes. The following morning a number of their carpenters came on board with the rude instruments of their art to give all possible assistance. It was signified to them that there were carpenters enough belonging to the ship, and that all that was desired was an asylum while repairing, and permission to purchase provisions and take on board fresh water.

An immediate supply of bullocks, hogs, goats, fowls, eggs, excellent sweet potatoes, fruit, vegetables, fire wood, and even candles, followed this intimation; and these supplies with plenty of excellent water, were regularly sent on board when wanted, for six weeks; the chief authorities obstinately persisting to refuse any payment or remuneration whatever—a disinterested generosity which was soon found to correspond with every part of the conduct of this mirable people.

There were considerable difficulties about their being permitted to land; but these were at last overcome; and the sick were accommodated in the garden of a temple or place of worship, of which the natives appeared to make very little use, and where they were treated with the kindest and most unwearied attention by all classes of the inhabitants—"Milk, eggs, meat and vegetables were brought to them every day, and whenever they felt disposed to walk they were accompanied by one or two of the natives, who took their arms on coming to rough ground, and often helped them up the steep side of the hill behind the hospital, to a pleasant grassy spot on the summit, where the natives lighted pipes for them."

[To be continued.]

We understand (says the Philadelphia Democratic Press of the 7th inst) that a two masted steam-boat is nearly completed in this port, which is intended to ply as a regular packet between this and Havana.

The Kentucky Gazette states that the Baptist Church in Lexington has resolved that it is contrary to the duty and character of its members, to become members of any Masonic, Tammany or other secret society! and it has enjoined upon any of them who may now be members of either of those societies, not to associate with them hereafter!

UPPER CANADA.

The Upper Canada Convention, "for redressing the grievances of the people," met at York on the 6th July. Richard Beasly, esq. was appointed chairman, and William J. Kerr, secretary. The convention were five days in session, and adjourned on the 20th, to meet again on the first Monday in Feb. next; having previously adopted a string of resolutions (15 in number, on motion of Mr. Gourlay, and agreed to an address to the Prince Regent, and another to Sir Peregrine Maitland, Lieut. Governor of that province, and appointed a committee to wait on the Lieut. Governor to request him to transmit their address to the Prince Regent. They gave a new name to the convention, styling it, "*The Upper Canada Convention of the friends of equity*," and divided it into two branches, one composed of the representatives of the five upper districts—with authority to meet at such times as either should deem proper.

Hamilton, the murderer of Major Birdsall, was yesterday delivered over to the civil authority, and will probably have his trial at the circuit in October. We understand that Gen. Scott, whose office it was to appoint a court martial, referred to the secretary of war for instructions, and was directed to deliver the prisoner up to be tried by the civil authority. *[Ibid.*

INTERESTING LOTTERY INCIDENT.

One day last week, an old man, from the country, dressed in coarse but decent homespun, called at the office of Messrs. G. & R. Waite in this city, and presented for examination a quarter of a ticket in the Medical College Lottery, which he had purchased some weeks before at the same office. It was the number which had drawn the prize of *thirty thousand dollars!* The money was immediately advanced to him for his share of the prize. His rapture and gratitude on receiving it, can be better imagined than described. He stated, that he had at home a wife and six children, hitherto supported by great industry, who would now, by this gift of a kind Providence, be made rich to the full extent of his humble wishes. *Baltimore Federal Gazette.*

CAUTION TO STRANGERS.

The following *new method* of Swindling, was completely carried into effect in this city, last week.—A farmer recently arrived from England, was walking the streets, without his coat, as if to denote he had been inured to labor, and was now in want of employment. A young man well dressed, and of genteel deportment, stopped him and enquired whether he understood gardening—being immediately answered in the affirmative, he added, I have a country seat in the neighborhood, and am in want of a person of your profession, but as you are a stranger, I must have some security that you will neither rob me nor injure my property. The honest son of Old Albion, confessed all his riches—he had seven guineas, eight silver dollars, and two silver watches, which he was willing to pledge for his fidelity. The Sharper then led him to a public house in Third-street, keeper of which he said was his brother, he obtained the watches and the money, ordered dinner to be provided for the deluded Englishman, and himself, but without waiting to partake of it, decamped by the medium of the back door.

[Philad. Amer. Daily Adver.

Charleston, August 6.

By the arrival this morning, of the British sloop Greenock, Capt. Lansfield, in 17 days from Kingston (Jam.) we have received our regular files of Jamaica papers from the 9th to the 15th ult. inclusive.—They contain nothing of importance, other than the following information:—Accounts had been received from Panama via Porto Bello, which represent the South Sea as smarming with Insurgent privateers, that had captured several very rich and valuable cargoes. Such was the vigilence with which they pursued their spoil, that canoes plying along the shore even, could not escape their observation.

Some private sales of coffee had been effected at Kingston on the 13th; the highest price, however, did not exceed 6l per cwt. A small quantity had been disposed of at public auction for 5l 14s 2d—another public sale took place on the 14th, of a quantity which was of superior triage, that brought 4l 15s—Only 43s 4d had been offered for ginger, and indigo could not bring more than 10s per lb. The schr President, Richardson, from this port, had arrived at Kingston. *[Times.*

Norfolk, August 10.

SHIPWRECK.

The British brig Joan, capt. Brittain, from Annatto Bay, (Jam.) bound to this port, with a full cargo of coffee, sugar, and rum, was cast away on the New-England end of the Colloredos, on the morning of the 4th July, being then 10 days out—crew and a small part of the cargo saved.—Mr. Frederick Myers, of this town, who was supercargo of the Joan, arrived here on Saturday night. He took passage from Havana in the schooner George Washington, captain Brehtoff, bound to New-York, but left her off the capes, and came up in a bay pilot boat.

[Reading Room Books.

A gentleman who left Havana on the 25th last month in the schr. George Washington, and who having left that vessel off the capes (she being bound to New-York) arrived here on Saturday night in a Baltimore pilot boat, has authorized the keeper of the Steam-boat Reading Room Books to say that the report received at Baltimore, from captain Webb, of the ship Benjamin, respecting a duty of *four dollars* being exacted from every vessel arriving at Havana, *for the support of the Inquisition*, or for any other purpose whatever, *is not correct*; no such duty having been laid. From a long residence at Havana, his commercial pursuits and sources of information, he presumes that if such had been the case, he must have known it. The tonnage duty of 2 dollars and 50 cents on all vessels, to take effect from the 1st July, is correct.—This gentlemen further states, that several private letters had been received at Havana from Cadiz, stating that the Floridas had been ceded to the U. S. but that little or no credit was attached to them: and the public attention was directed to the U. S. for a confirmation of the report. Havana was not more sickly than usual at this season of the year. Persons who were compelled to undergo great fatigue thereby overheating themselves, and then by imprudent exposure to the night air, generally fell victims to the fever which soon carried them off.—Business was rather dull, and the prices had varied but little since last quotations. *[Ibid.*

CUMBERLAND BANK ROBBERY.

Mr. TOPLIFF, our Boston Correspondent, under date of Friday noon, writes, "I have just learned by a gentleman from Portland, that the persons concerned in the late Bank robbery, have been discovered. Their names are Daniel Manly, F. Dela and Capt. Rolfe. Manly was apprehended a few days since, on suspicion, and not being able to give security for his appearance at the next court, was sent to jail. Captain Rolfe had taken passage in the mail stage for Boston, was taken out of the stage (although there was nothing very suspicious of him,) and carried before the Directors, by whom he was examined. They made it appear to him that the evidence was so strong against him, that he would certainly be convicted, and advised him to discover his accomplices, and where the money was secreted.

Furthermore, they offered to give him 10,000 dollars and his liberty, if he would discover where the money was and who were the thieves. This had such an effect on him, that he made a full disclosure, and named the persons before mentioned, as the robbers; and observed if any of the Directors would accompany him, he would go to the place where the bills were secreted, and deliver them up; they accordingly accompanied him. On their arrival at the place, the bills were gone, and he observed that Manly must have taken them. He then carried them to another place, where the specie was secreted—found it, and delivered it to the Directors. He was then set at liberty, and in twenty minutes after, he shot himself. The mortification of not finding the money with the disappointment of not receiving the reward, together with the part he had acted, it is supposed proved too strong for his mind to overcome, and thus prompted him to stifle conscience in the arms of death."

Foreign Articles.

[From London papers received at the office of the N. Y. Mercantile Advertiser.]

London, June 17.—This morning we received Paris papers of Sunday last. An article from Madrid states, that an expedition has at length sailed from Cadiz for South America, but it consists only of 2,000 men and a frigate, a force as large we believe, as the present state of Spain can afford to send, but too contemptible to effect any important object on the vast continent of South America. No notice is taken in these papers of the rumour we mentioned yesterday relative to the confederation of the King of Portugal with the Independents in the Spanish Provinces.

Corn Exchange, June 17.—We had no fresh arrivals this morning, and scarcely any sales made; indeed the trade is so very dull we can only quote the prices nominally the same as on Monday.

Westminster.—Mr. Hunt, on his becoming a candidate for the representation of Westminster, has made the following affidavit before the Lord Mayor of London:—

"I, Henry Hunt, do hereby voluntarily and solemnly swear, that I will never accept or take from the King, or his ministers, either directly or indirectly, for myself or any of my family, any place or pension, or emolument, grant, contract, title, or any other gratuity whatsoever. I will never cease my endeavors to obtain for every man above the age of 18 years, a vote for a representative in the Commons house of Parliament. I will never fail to exert my most strenuous endeavors to repeal that cruel, unjust and partial law, the starvation act, commonly called the Corn Bill. I will keep the poll for the city of Westminster open till the last moment allowed by law."

The North Pole Expedition.—It appears from a letter received at Lloyd's, from Berwick, that the expedition to the North Pole, arrived at the Shetland Islands on the 30th April and the first of May, and sailed again on the 3d and 10th of May.

Norway and Sweden.—A proposition has been made to the Diet of Norway to demolish all the fortresses of that kingdom. These works having been constructed as a defence against the Swedes, it now becomes a national concern to save the expense of their useless garrisons. The Swedish Prince Royal, Oscar, is appointed by his father, Lieutenant-General of the Norwegian army. The Hamburgh papers announce the death of Field Marshal Prince Barclay de Tolly, one of the most distinguished officers in the Russian army.—Field Marshal Prince Schartzenberg, the commander in chief of the allied armies, on their first entrance into France, also lies dangerously ill at Vienna.

India.—A supplementary gazette published on the 10th instant, contains a large body of despatches from India, but they relate entirely to transactions which have already been made public in the papers and letters from Bombay. The principal military transactions are the defeat of Holkar by Sir T. Hislop, on the 21st of last Dec. and the proceedings of Gen. Doveton against the forces of the Rajah of Berar, which finally resulted in the submission of the whole country to our arms—Calcutta Gazettes to the 2d February present accounts of a distinct series of successes obtained by detachments of the British troops over many of the Pindaree chieftains, to the northward of the river Nubudda.—Headed in all directions, and almost surrounded by the co-operating divisions of the Generals Donkin, Marshal Sir William Keir, and col. Adam, the Pindarees, with the loss of much of their baggage, betook themselves towards Holkar's camp, but having intelligence of the treaty negociated by the leader with the British government, they moved to Rampoora, where, it is said they were attacked by Gen. Brown, and dispersed without resistance. Cheetoo the most powerful of these plunderers, whose immediate followers had had a principal share in the former invasion of the British territories, was attacked by Sir Wm. Keir, on the 5th Jan. where he lost five guns and a portion of his baggage. The main body of the Pindarees were reported to have fled in the direction of Ouleypoor. Cheetoo's force was reported to have been beaten and plundered near Shapoorab, where his brother was taken prisoner, and he himself escaped with only nine followers. General Smith had an action with Apagee, a Sardar of the Peishwa. The fort was carried by escalade, when Apagee with several other officers were made prisoners—and 70 guns, 83 elephants, a number of fine horses, and great quantities of treasure were taken.

Paris, June 14.

The Emperor of Russia, after a residence for four days in Odessa, set out on the 16th of May for the Crimea. He reviewed the troops assembled in the camp of Terspol, near Bender, among which were thirty regiments of infantry. His majesty was so satisfied with the flourishing condition of Odessa that he dispatched a chasseur of his guard as a courier to Paris, to convey to the duke of Richelieu a letter written with his own hand, in which he expresses to this founder of Odessa his lively gratitude. The Emperor assigned two millions of roubles for construction of a lazaretto and an aquaduct.

General Benigsen has resigned his rank in the Russian army, in consequence of his advanced age, and has returned to Hanover, his native country.

Paris, June 15.

The old men in the environs of Paris declare, that they do not remember a year in which the vines have given finer hopes than at this moment. The heat, which is extreme for some days, gives the expectation of some greater abundance.

Piano-Fortes and Organs.

THE subscriber, who carries on the manufacture of these instruments in N. York, is now in Alexandria, where he will remain a short time, during which he will attend to repair, regulate the action and improve their tones and musical effects.—A specimen of his work and abilities may be examined in the store second door below the Mechanics' Bank, King street, where he offers for sale two of his Piano-Fortes at the New-York prices—one of them an elegant upright grand, of a full bodied mellow tone and brilliant touch—the other is of the horizontal sextagon form, highly finished, with extra additional keys. He warrants them perfectly sound, and of the first quality.—He will allow in exchange a fair price for old pianos or organs, being such as he approves.—He also has for sale a few fine toned old violins and elegant bows, and concert flutes.—He is perfectly acquainted with the harpsichord construction, and offers to put them in complete order.

Orders left at the store, or at Mr. Abercrombi's, cabinet-maker, or at Capt. Nelson's, King street, will be promptly attended to on his return to New-York.

Ten Dollars Reward,

WILL be given by the subscriber, living near Haymarket, in Princewilliam County, for the recovery of a horse, which strayed or was stolen from her farm, on the night of the 13th of April last. The above named horse is 5 or 6 years old, of blood bay color, 15 hands high, long switch tail, rubbed on the left side by the harness of the cart or waggon, in either of which he had been used to draw; he has no white marks or brand, and the hair on the top of the head between the ears is worn short.

August 10 SUSANNAH F. GRAHAM.

Fifty Dollars Reward.

RAN away from the subscriber, on the the 3d inst. Negro JEM, about 5 feet 5 inches high, 25 or 26 years of age, stout and well made, except that he is perhaps a little knockkneed; his complexion dark, has a large scar on the upper lip, occasioned, it is said, by his falling, when a child, on some edged tool; has a down look when spoken to, and is apt to be short and insolent in answering. The clothes he took with him are not recollected, except a red flannel shirt, a pair of Russia duck sailor's trowsers, and a coarse wool hat with broad brim, nearly half worn Having gone off without any provocation, it is probable his intention is to steer his course towards Baltimore or Pennsylvania, and pass for a free man. He has hauled the seine the two last seasons in Pomonkey, where he may have gone, or perhaps to Alexandria, where he is also a little acquainted. If taken 20 miles from home, or out of the county, I will give 20 dollars for securing him in any gaol, or if taken 50 miles from home, or out of the state, I will give the above reward of fifty dollars. The Improved Patent Plough.

THE expensive force necessary for ploughing in the common way, has been long known and lamented by farmers. Many attempts have been made to obviate that inconvenience, by the construction of a plough on Mechanical principles, and patents have been granted to applicants who profess to have improved on that agricultural implement. These improvements are now before the public, the proper arbiters in such cases, who will approve or condemn according to the merits or demerits of the performance.

I, also, have become a candidate for public patronage, and shall attempt to explain and give reasons to show at least some advantages which I think my plough possesses over any other now in use.

For its durability and simplicity of construction, its first excellency, no plough now in use surpasses it—but its chief advantages lie in the ease with which it breaks and inverts the soil, and will plough in clover or grass land of any kind without being clogged or choaked. These properties arise from the mechanical principles on which it is formed. The wedge is said to possess the requisite properties for breaking and raising the soil with the least applicable force. This plough is so formed as to form a wedge with the mould-board, which raises the earth gradually to the greatest perpendicular height, when by a regular turn of the mould-board it is inverted, rendering the pressure inconsiderable, and consequently the force necessary to draw it proportionably small. The beam is made of iron or wood, and has a considerable curve, which permits all vegetable matter to pass off. I would recommend the iron beam, as it has several advantages over the wood, and the difference of expense small.

I have thought it a duty to my fellow citizens to publish a few lines of instruction to facilitate the mode of using and repairing the same. Before the plough is used, the mould-board should be scoured with free stone or a well burnt brick and water until it is perfectly smooth. The horses should draw by a double or treble tree, which is confined to the clevice or beam by an open ring. The point and share should be laid with steel when necessary; the latter must be kept level with the bar, and the point inclined a little down. If this be well attended to by the good husbandman, he will be able to eat the 'fatted calf, when the indolent will sink into want.

These ploughs will be furnished at my shop in this County' and in Alexandria by James Atkinson, near Poston's tavern, Peyton street.

Valuable Land for Sale.

I WILL sell the farm on which I reside, known by the name of Indian Town, and containing about one thousand acres. It is situated in Charles Co. Md on Nanjemoy Creek near its mouth, about seven miles from Port Tobacco, and forty from Washington City. Few farms combine greater advantages than this; added to a fertility of soil equal to any in the country, it binds on the creek nearly two miles, which affords great facility in getting its productions to market, and precludes the necessity of much fencing; the creek affords in their seasons, fish and wild fowl in abundance.—The soil is peculiarly adapted to the growth of Tobacco, Wheat and Indian Corn, and the plaister has been found from experience to act on it admirably. There are now about 100 acres in clover, some of which is well set. The improvements are a new two story dwelling house 16 by 40 feet, kitchen, barn, stables, carriage house, with every other necessary out house, the whole in good repair. There is also a wind-mill in good order, the toll of which affords meal enough for the support of the farm.—Also, one other tract containing 115 acres in the forest, about three miles distant, entirely in the wood. There is a well of excellent water in the yard, and several springs on different parts of the farm. The premises may be viewed, and the terms known by application to the subscriber. Should the above farm be unsold on the 1st of Sept. next, I will lease it for a term of years.

THEOPHILUS HARGRAVE.

Indian Town, June 29 mthtf

For Sale,

A VALUABLE FARM, containing between six and seven hundred acres of land, the greater part of which is in timber, and adjoins the land of Charles Thift and Edmond J Lee, esq. and extends to the road from Leesburg to the mill lately known as Miller's Mill, on Goose Creek, and not more than three quarters of a mile from the turnpike road now making. The furthest boundary of this land is not more than three miles from Leesburg, and the nearest, which is in timber, not more than one mile and a half. The timbered land will be laid off into 10 or 15 acre lots, reserving a sufficient quantity for the land now cleared and in cultivation. It is unnecessary to say that this land is as well adapted to plaister as any in that part of the country; and if not sold at private sale previous to the September Leesburg court, will be then offered at public sale, and the terms made known on the day.

There are fifteen or twenty negroes residing on the farm that may be purchased with it if wanted

HOUSES, LANDS, &c.

For Sale,

UNDER an act of the Legislature of Virginia, passed on the 21st day of February, 1818, all that part of a tract of land lying in the county of Fairfax, and commonly called Retirement, to which the widow and heirs of the late Walter D. Brooke are entitled; as well their interest in that part which has been allotted to Ann Brooke for her dower, as that part of which the said widow and heirs are now in possession. The sale will be made at public auction on the premises near where the stage road crosses Dogues Run, on Thursday the 17th of September next, if fair, if not the next fair day. The terms are one half cash, the balance on a credit of twelve months.

A long Lease for Sale.

THE subscriber will sell the lease which has 18 years to run, of a small Farm he at present occupies, lying on the turnpike road leading from Alexandria to Washington city, about half way between the two places, and adjoining the lands of Mr. George Wise and Alexander Hunter. The improvements are a snug small Dwelling-

House and kitchen, good stables, spring house and slaughter house, and all the useful tools therein for killing, together with a house with a large kettle for rendering neat's feet oil, which is a good business if properly attended to, and may be made much more so by adding the glue-making, which may be easily done—there is also a good garden and a number of beehives. I will likewise

sell a likely young Horse, that has been well broke to the saddle or any kind of harness, a light cart and harness, a first-rate milch cow, the farming utensils, and household and kitchen furniture of every description, some of which are very good. The whole will be sold for cash, or on a short credit. The lease will be sold with or without the other articles, and immediate possession given. If not sold prior to the 1st day of September next, the above described articles will on that day at 3 P M be offered at public sale on the premises—and if the lease is not sold, the farm will then be rented for one or more years. It is thought unnecessary to give a further description of this valuable property, as it is presumed any person inclined to purchase or rent will view the property prior to that day, and it will be found very advantageous, as there are a number of articles on it which will be sold low and well suited to it. An early application is recommended and the whole will be sold a bargain.

Plaister Land.

The subscriber offers for sale a FARM of 430 acres, being part of the tract whereon he resides in Fauquier county, Va. More than one-third of this Farm is in timber and is land of the richest quality. The cleared land is in good heart, having had the advantage of a clover lay, and no soil being more susceptible of plaister improvement. He would also dispose of a lot of 50 acres, the whole of which is in timber, and is firstrate tobacco and meadow land. On this lot has been erected a well built saw mill, contiguous to which (at the confluence of Broad and Mill runs) is a most valuable scite for a merchant mill. No property is better worth the attention of a person wishing to engage in such business. On the first mentioned farm are a commodious overseer's house, a new barn, stables, corn houses and negro quarters, and about 20 acres of timothy meadow.

500 acres of Land for sale.

THIS Tract is situated in Westmoreland county, Virginia, adjacent to Mr. Garnett Hunter's Plantation, and contiguous to the waters of the Potomac. The neighborhood is good—water excellent, and very desirable situations for building. A considerable proportion of the land is well timbered, besides a good deal of cedar, pine and other wood, sufficiently convenient to make it an object for those who may be disposed to send it to market—it is nearly equi-distant from Baltimore, Washington and Norfolk.

Any one wishing to purchase may apply to ROGER JONES,
Alexandria.

Also, a very valuable LOT, containing 140 acres, being a part of the late Mr. John Taberville's tract—within 6 miles of Georgetown, 3 from the Little Falls Bridge, and near to the turnpike leading from thence to Wiley's, in Fairfax county, Va. A great proportion of this land is exceedingly well timbered, and that part which is not, is so recently cleared as to be in an active state for cultivation and already in a productive condition.—For terms, apply to PHILIP C. JONES, esq in Leesburg, Va. or to R. JONES.

Public Sale.

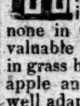
WILL be sold on Thursday, the 20th of August next, if fair, if not, the next fair day,

A valuable tract of Land,

lying near the Falls Church, in Fairfax co. Virginia, containing one hundred and ninety-eight acres and a half and the 16th part of an acre—lying within 10 miles of Alexandria, 7 miles of Georgetown and Washington, and about four miles from the Falls bridge, with a good road from the said farm to all the abovementioned places. On it is



a good Dwelling House, Kitchen, Barn, and all other convenient out houses, 10 acres of meadow, now in timothy, which is exceeded by none in this county; also several acres of valuable meadow land, which may be put in grass by a very little trouble; a valuable apple and peach orchard. This land is well adapted to clover and plaster, is well watered, and a good spring within 50 yards of the door. The situation is handsome, has been admired by many, and lies in a very healthy neighbourhood. A sufficient quantity of timbered land is attached to it, and that of the best quality. Many other advantages which it possesses are not enumerated. The sale will commence at 12 o'clock, and the terms made known on the day.

BILL IN CHANCERY.

Robert Perry
versus
James B Dunnington, Robert Dunnington, Francis Taylor and Elizabeth B. his wife, James Bloxham and Catharine his wife, William Simmons and Esther his wife, heirs of William Dunnington.

THE Complainant alleged in his bill that the Respondents have in possession the real estate of their deceased father Wm. Dunnington, whose personal estate was not sufficient for the payment of his debts. Wm. Dunnington's estate is indebted to the complainant in a large sum of money. The object of the bill is to procure a decree for the sale of the land, for the payment of the debts remaining unpaid by the personal estate. Some of the heirs of Wm. Dunnington are non-residents.—It is thereupon, at motion of the Complainant, ordered that he cause a copy of this order to be inserted in the Alexandria Gazette for the space of three months, to the intent that the absent defendants may have notice of this application, and of the subject and object of the bill, and may be warned to appear in this court in person or by a solicitor, to shew cause, if any there be, wherefore a decree should not pass as prayed. Dr. Thomson's System of Chemistry.

IN FOUR VOLUMES OCTAVO.

THE preceding edition of Dr. Thomson's Chemistry, had acquired so much reputation both in England and upon the continent of Europe, that a new edition, comprising the new facts with which the science had been enriched, and the new views of the subject which extended knowledge had suggested as indispensable, was eagerly looked for by the scientific world. A new edition has accordingly appeared, wherein the former edition of five volumes has been condensed into four.

All the new discoveries, and all the new theories of Chemical Phænomena, have been considered and embraced in the present improved edition: so that it is indispensable to the chemical student, as presenting the only condensed view of the changes and alterations in chemical doctrine, which the discoveries of the last ten years have suggested. No apology therefore can be necessary for reprinting such a book in this country; for the press does not furnish a substitute for it. But, there is so much theoretical suggestion—so much abstruse calculation—so much fact of dubious authority—and so much dubious validity—that notes and illustrations are absolutely necessary, not merely to render the book more useful, but more intelligible.

Under these impressions, I thought fit to write notes in illustration (and sometimes in contradiction) of the work itself, rather than to make any abridgement of it. Those who wish to know the modern views of chemical science, *must* peruse it; and to very many who will be anxious to study it, elucidation will be necessary. I have endeavoured to supply these, to the best of my ability; regardless whether my own opinions are in dissonance or coincidence with those of my author; leaving to the reader to decide between us.

The work will be published, with notes and illustrations, in four volumes 8vo.

THOMAS COOPER, M. D.

James Kennedy & Son,

RESPECTFULLY inform the public that they have just received from *LEE's MEDICINE STORE,* No. 46, Maiden-lane, New-York, a fresh supply of the following valuable MEDICINES:

Hamilton's Worm destroying Lozenges,

Which have within sixteen years past cured an immense number of persons of both sexes of every age and in every situation, of various dangerous complaints arising from WORMS, and from obstructions or foulness in the stomach and bowels.

This medicine bears no analogy whatever to others of similar titles so commonly complained of as operating with violence; on the contrary a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent & is so mild in its operation that it cannot injure the most delicate pregnant lady or the tenderest infant of a week old should no worms exist in the body; but will without pain or griping cleanse the stomach and bowels of whatever is foul or offensive, and thereby prevent the production of worms and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mildest purgative that can be used on any occasion.

Description of Worms, and the symptoms by which they are known.

Worms which infest the human body are chiefly of four kinds viz.—The Teres or large round worm; the Ascarides or small maw-worm; the Cucurbitine or short flat white worm; and lastly, the Tænia or tape-worm, so called from its resemblance to tape. This is often many yards long and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite, sometimes loathing food and sometimes voracious; purging with slimy and fœtid stools; vomiting; large and hard belly; pains and sickness at the stomach; pains in the head and thighs and lowness of spirits; slow fever with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face bloated and flushed.

Persons afflicted with any of the above symptoms should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success in all complaints similar to those above described.

A dose of this medicine given occasionally during the warm season, will effectually prevent "the vomiting and purging of children"—a dreadful disorder, which annually destroys thousands of the infant part of our citizens. It is likewise the mildest and most certain remedy known, and has restored to health and strength a great number when in an advanced stage of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases.

Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

The Restorative Powder for the Teeth and Gums.

For the prevention and cure of BILIOUS AND MALIGNANT FEVERS is recommended

HAHN's ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of person can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficacious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

Hamilton's Elixir,

A sovereign remedy for colds, obstinate coughs, asthmas, sore throats, catarrhs, and approaching consumptions.—To parents who have children afflicted with the *HOOPING COUGH,* this discovery is of the first magnitude, as it affords immediate relief, cheeks the progress, and in a short time entirely removes the most cruel disorders to which children are liable. The Elixir is perfectly agreeable, and the dose so small that no difficulty arises in taking it.

Hamilton's Grand Restorative,

Is recommended as an invaluable medicine for the speedy relief and permanent cure of

Hamilton's Essence and Extract of Mustard.

A safe and effectual remedy for acute and chronic rheumatism, gout, rheumatic gout, palsy, lumbago, numbness, white swellings, chilblains, sprains, bruises, pain in the face and neck, etc. etc.

Lee's Ointment for the Itch.

Warranted an infallible remedy at one application, may be used with perfect safety by pregnant women, or on infants a week old, not containing a particle of mercury or any dangerous ingredient whatever, and not accompanied with that tormenting smart which attends the application of other remedies.

Hahn's true & genuine German Corn Plaister.

An infallible remedy for corns, speedily removing them root and branch, without giving any pain.

The Genuine Persian Lotion,

So celebrated among the fashionable throughout Europe, is an invaluable cosmetic, perfectly innocent and safe, free from corrosive and repellent minerals, the basis of other lotions, and of unparalleled efficacy in removing blemishes of the face and skin, freckles, pimples, inflamatory redness, scurfs, tetters, ringworms, sunburns, prickly heat, &c.

Hahn's genuine Eye Water,

A sovereign remedy for all diseases of the eyes, whether the effect of natural weakness or of accident.

Tooth Ache Drops.

The only remedy yet discovered which gives immediate and lasting relief in the most severe instances.

Lee's Infallible Ague and Fever Drops

For the cure of agues, remittent and intermittent fevers.

☞ At the place of sale pamphlets may be had gratis, describing cures performed by the above medicines; the number, importance and respectability of which, fully justify every article of this advertisement.

Alexandria, August 4.

WAS committed to the jail of this Co. as a run away, a negro man, who calls himself JOHN WEAKS, and says that he was born free in Prince George Co. Maryland, that his mother's name is Sally Green, who lives near the road leading from the Alexandria Ferry to the Eastern Branch bridge, adjoining one Hen. Thompson. He was committed to this jail on the 7th May last, and then called himself William Washington, but made his escape the 16th. He is about 25 years of age, 5 feet 7 inches high, stout made. Says he is known to Mr. Daniel Moxley, and Henry Thompson, of Maryland. The owner is requested to come and prove his property, pay charges, and take him away, otherwise he will be disposed of as the law directs.

Ten Dollars Reward.

RAN away from the subscriber, on the night of the 7th June inst. an apprentice to the Printing Business, named JOHN SETON, born in Ireland, between 16 and 17 years old, dark complexion, eyes and hair. Had on and took with him, a long blue cloth coat, second quality, gray ribbed pantaloons, striped summer vest, cotton stockings, ruffled shirt, a roram hat, besides coarse shirts, a great coat of brown cloth, with a velvet collar, and silver hook and eye, a pair of blue cloth trowsers, and other clothing not recollected. It is believed he is gone to New-York.

Whoever takes up said apprentice, confines him in any jail in the United States, and gives me legal information of the same, shall receive the above reward.
